Education

B.A. College of Engineering & Technology, Jamshedpur, Jharkhand

2015 - 2019

Professional Experience

Designation: High Risk Mechanical Supervisor

East India Engineers & Consultants

Tata Steel Site

09/2019 - 09/2021

- Led a team of **12 engineers** in **high-risk mechanical operations**, specializing in **Conveyor Belt Joint projects**, with a focus on maintaining **safety and operational excellence**.
- Conducted over **300-400 safety meetings**, boosting team safety by **40%** and ensuring compliance with safety protocols.
- Worked on **10-12 of the most critical projects** in **hazardous environments**, consistently performing **50% better** than previous benchmarks, ensuring on-time delivery and high-quality outcomes.

Technical Skills

- *Frontend Development:* **HTML, CSS, JavaScript, React.js, Redux**
- *Backend Development (Currently Learning):* **MongoDB, Express, Node.js**
- *Version Control:* **Git**
- *Deployment:* **Netlify, Vercel, GitHub**

Projects

GamingGeeks — Blogging WebApp — MERN | [Github](#) | [Live Demo](#)

March 2025 - May 2025

- Developed **GamingGeeks** — a MERN-stack blogging platform for gamers and geeks to share insights on PC, Consoles and Gaming.
- Enabled **OTP-based login and signup** using **NodeMailer**, enhancing account security with email verification.
- Designed a minimalist, content-focused UI with a **non-conventional navbar** and **category slider** for a distraction-free reading experience.
- Built a dynamic **Home Page** displaying all blog articles with real-time **AI-powered sentiment analysis** (positive/negative/neutral) for the article.
- Implemented a user **Dashboard** allowing blog creation, preview of the latest four posts, and future features like profile, settings, and saved articles.
- Developed an **Article Page** with full blog content and integrated commenting system to foster reader interaction.
- Used **React.js** for frontend with modular components, **Express.js + MongoDB** backend, and intuitive routing via React Router.
- Prioritized scalability and code maintainability; upcoming improvements include working category filters and responsive design with media queries.

Flipkart Inspired Ecommerce website | MERN | [Github link](#)

January 2025 - In Progress

- **E-commerce platform** inspired by Flipkart, built with the **MERN stack (MongoDB, Express.js, React.js, Node.js)**.
- **User authentication** via **token-based login**, **email OTPs**, and **contact OTP**.
- **Product listings**, **shopping cart**, and **order management** functionalities, powered by **React.js** and **Redux**.
- **Seller and buyer functionalities**, including product upload and inventory management with **Node.js** and **Express.js**.

- **Responsive design** for all devices, styled with **Tailwind CSS**.
